SUMMARY

Computer Science student at the Egyptian Chinese University with interests in Software Engineering, AI, and Cybersecurity. Skilled in Python, C++, Linux, and OOP with hands-on experience building AI, embedded systems, and software projects through hackathons and academic teamwork. Seeking internships in Software Engineering, AI/ML, or Cybersecurity.

EDUCATION

Egyptian Chinese University (ECU) <i>Bachelor of Computer and Information Systems (CIS)</i>	Cairo, Egypt
GCI World 2026 — April Program <i>Matsuo-Iwasawa Laboratory, The University of Tokyo</i> Diploma program covering Data Science, Python, and Artificial Intelligence	Tokyo, Japan <i>Apr 2026</i>

PROJECTS

Solar Tracking System - Led a team to design and build a solar tracking system using Arduino Uno, LDR sensors, and a servo motor - Improved solar panel efficiency through automated sunlight tracking; coordinated team tasks and delivery	Team Leader 2025
Learning Management System (LMS) Developed a C++ Learning Management System using OOP principles with authentication, course management, and persistent file storage	C++ — OOP 2025
Cinema Ticket Booking System Built a console-based cinema reservation system with seat selection, booking management, and structured menu navigation in C++	C++ — OOP 2025
Arabic Aspect-Based Sentiment Analysis (ABSA) Fine-tuned AraBERT models for Arabic aspect-based sentiment analysis and deployed a Streamlit dashboard during a 12-hour AI hackathon	NLP / ML 2026

ACHIEVEMENTS

DeepX AI Hackathon — Nile University (Microsoft Club) Ranked 17th out of 151 teams; achieved one of the highest model accuracy scores among all submissions	Apr 2025
--	-----------------

ACTIVITIES & MEMBERSHIPS

- Member — ICPC (Competitive Programming), Google Developer Groups (GDG), IEEE 2025 – Present - Operations Volunteer — "Made in Ain Shams" Event: assisted in logistics and team coordination 2025	
--	--

COURSES & TRAINING

- CS50: Introduction to Computer Science — Harvard University (Online) - Python, Data Science & Machine Learning — Online - TryHackMe — Active learner, beginner cybersecurity and networking labs	
--	--

SKILLS

Programming: C++, Python, C (Basics)	
Technical: OOP, Data Structures & Algorithms, Arduino & Embedded Systems, ML Fundamentals, Linux CLI, Networking Basics	
Soft Skills: Communication, Teamwork, Leadership, Public Speaking, Time Management	
Languages: Arabic (Native), English (B2 – Upper Intermediate)
